**PREAMBLE FOR RELICENSING PROCESS**

Since initiating the Parr Fairfield Hydroelectric Project (FERC No. 1894) (Project) relicensing process, South Carolina Electric & Gas Company (SCE&G) has held initial consultations with resource agencies and other interested stakeholders and has subsequently formed the Lake and Land Management and Recreation Resource Conservation Group (RCG) and the Lake and Land Management Technical Working Committee (TWC), a sub-group to the RCG. RCG members have agreed that the mission of the Lake & Land Management and Recreation Resource Conservation Group should, in part, be to develop a consensus based Shoreline Management Plan (SMP) that identifies appropriate shoreline activities within the Project boundary and guidelines that provide a structure that helps to ensure these activities are conducted in a manner to avoid or minimize environmental impacts. In depth reviews of, and the resulting proposal for changes to, the existing SMP have been undertaken by the TWC. TWC members have worked together to develop the enclosed draft outline for a revised SMP. TWC members will continue to work together through this relicensing to populate the SMP outline in a consensus-based manner with the goal of developing an SMP consistent with project purposes and one that addresses the needs of the public.
